Reports
Creating and Viewing Reports in Zoho Creator

Department of Computer Science and Engineering

Student Name: Akash M

Roll No: 240701025

Application Name: College Student Administration System

Objective

To study the different report types available in Zoho Creator and to create and view List, Grid, Kanban, and Calendar reports for the College Student Administration System, using the Attendance data.

Introduction

A report in Zoho Creator is a view that displays the records stored through a form. A single form can have any number of reports, each presenting the same data in a different arrangement, with its own columns, filters, grouping, sorting, and permissions. Reports are created without writing code; the required view type is selected and the fields to be displayed are chosen.

Report Types Used

Report Type	Description	Used For
List	Displays records row by row with selected columns, colour-coded status, search, sorting, and record count	All Attendance Records — viewing every attendance entry with its status, remarks, recorder, and session
Grid	A spreadsheet-like view in which records are numbered and values can be edited inline	All Attendance Records — quick review and correction of attendance data
Kanban	Groups records into vertical lanes based on a chosen field, shown as cards	Attendance records grouped by Attendance Status
Calendar	Plots records on a calendar using a date field, with Month, Week, and Day views	All Attendance Records — attendance entries plotted by Attendance Date

Table 4.1: Report types created in the College Student Administration System.

Screenshot-based lab record

The following pages contain the actual Zoho Creator screenshots of the List, Grid, Kanban, and Calendar reports created for the application.

Screenshots 1 – List Report

The List report displays the attendance records row by row with the columns Student, Course, Attendance Date, Attendance Status, Remarks, Recorded By, Session ID, and Is Compulsory. The

Attendance Status values are colour-coded, and search, column-wise sorting, and a record count are available.

All Attendance Records

Student	Course	Attendance Date	Attendance Status	Remarks	Recorded By	Session ID	Is Co
STU2026001 STU2026002	CS101	21-Sep-2026	Excused	Early departure before class end	Admin Lee	SES002	false
STU2026001 STU2026002 STU2026003 STU2026004 STU2026005	CS101 CS205 MKT401	21-Sep-2026	Late	Tardiness noted for second time	Admin Smith	SES003	true
STU2026001 STU2026002 STU2026003 STU2026004 STU2026005	CS101 CS205 BUS300 MKT401	21-Sep-2026	Absent	Present and active participation	Admin Chen	SES001	true
STU2026002 STU2026003 STU2026004	CS101 BUS300	21-Sep-2026	Present	Excused absence with medical certificate	Admin Lee	SES002	false
STU2026001 STU2026002 STU2026003 STU2026005	CS205 BUS300	21-Sep-2026	Present	Late arrival due to traffic	Admin Smith	SES001	true

Figure 1: All Attendance Records List report showing five attendance records.

Screenshots 2 – Grid Report

The Grid report presents the same records in a spreadsheet-like layout with serial numbers against each row, which makes bulk review and inline editing convenient. Students and courses appear as editable tags, the date has a date picker, and the Attendance Status is a drop-down. Changes made in the grid are applied using the Save Changes option.

All Attendance Records* Save Changes Remove Changes

	Student	Course	Attendance Date	Attendance Status	Remarks	Recorded By
1	STU2026001 × STU2026002 ×	CS101 ×	21-Sep-2026	Excused	Early departure before class end	Admin Lee
2	STU2026001 × STU2026002 × STU2026003 × STU2026004 × STU2026005 ×	CS101 × CS205 × MKT401 ×	21-Sep-2026	Late	Tardiness noted for second time	Admin Smith
3	STU2026001 × STU2026002 × STU2026003 × STU2026004 × STU2026005 ×	CS101 × CS205 × BUS300 × MKT401 ×	21-Sep-2026	Absent	Present and active participation	Admin Chen

Figure 2: All Attendance Records Grid report with numbered rows and inline editing.

Screenshots 3 – Kanban Report

The Kanban report groups the attendance records into lanes based on the Attendance Status field. Each record is displayed as a card showing the attendance date, the courses, the status, the person who

recorded it, and the session ID, and a card can be dragged from one lane to another to change its status.

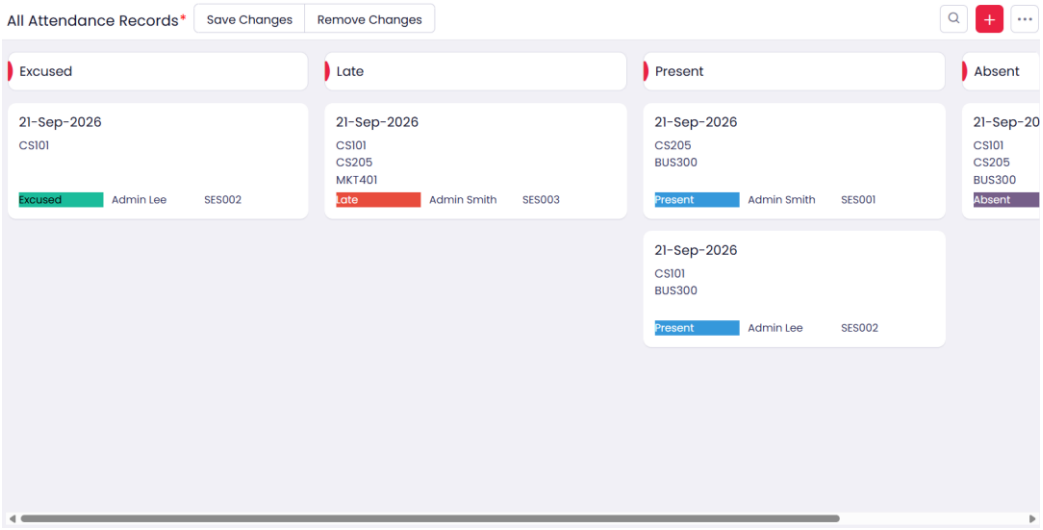

Figure 3: All Attendance Records Kanban report grouped by Attendance Status, with Excused, Late, Present, and Absent lanes.

Screenshots 4 – Calendar Report

The Calendar report plots the attendance records on a calendar using the Attendance Date field, so that every entry appears on the day it was recorded. The view can be switched between Month, Week, and Day, and the Week view can also be displayed with hour-wise time slots.

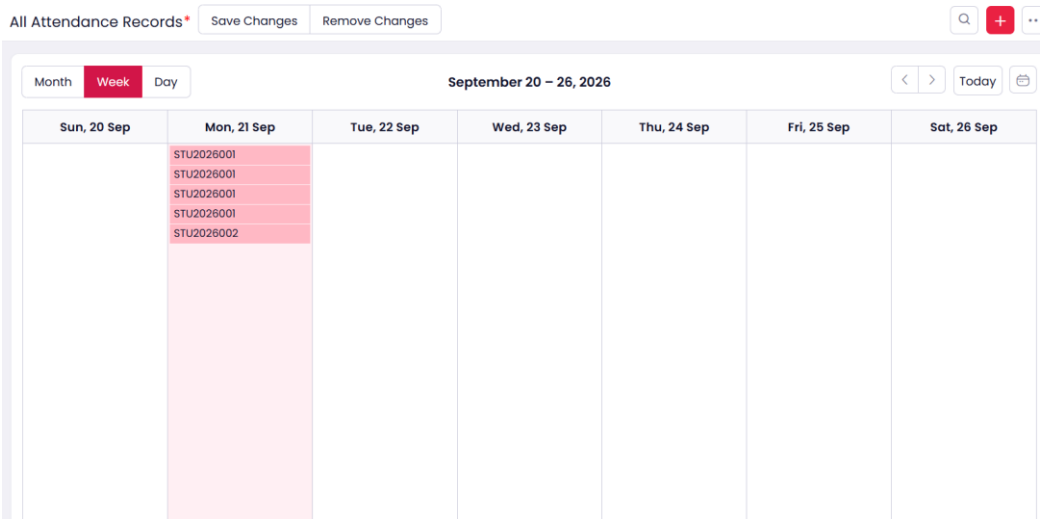

Figure 4.1: All Attendance Records Calendar report — Week view for 20–26 September 2026 showing the five entries on Monday, 21 September.

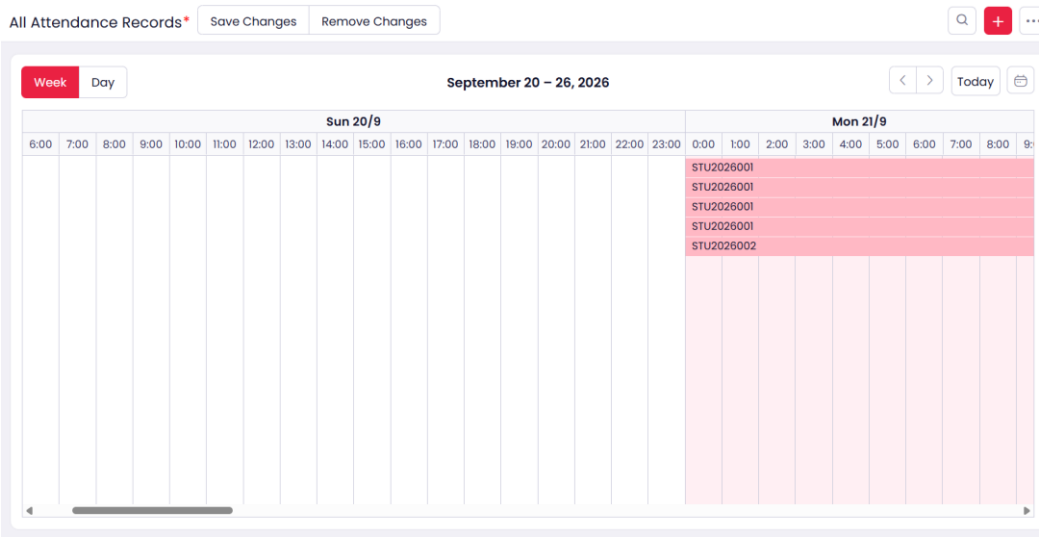

Figure 4.2: All Attendance Records Calendar report — Week view for 20–26 September 2026 with hour-wise time slots.

Observation

The same Attendance data was presented in three different ways — List, Grid, and Kanban — simply by creating different reports on the same form, and no data was duplicated. The Kanban report required only the selection of the Attendance Status field to group the records into Excused, Late, Present, and Absent lanes, and the Calendar report required only the selection of the Attendance Date field to place each entry on its day. This shows that in Zoho Creator the presentation layer is fully separated from the data layer, and that multiple views can be provided for different users without any additional coding.

Result

List, Grid, Kanban, and Calendar reports were successfully created and viewed for the College Student Administration System. The records were displayed correctly in each report type, and the grouping, inline editing, and date-based views functioned as required.
